DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

3. Claims 15-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Priegnitz et al. (USP 6,162,267) in view of conventional knowledge in the art.

Priegnitz et al. teaches a steam reforming process employing a reforming catalyst selected from noble metals combined with Ni or Co on a with spinel support, i.e. magnesium aluminate under a temperature of 650 to 950 C (see col. 5, lines 63 - col. 6, line 20, claims).

It is acknowledged that the reference does not disclose the performance characteristics specified in the claims. The invention as a whole, however, would have been *prima facie* obvious

to one at the time the invention was made because the catalyst disclosed in the reference, being substantially similar to that in the claims would be expected to perform similarly under the same conditions. Note that the Office does not have the capability to test each claimed product to ascertain whether it will perform as claimed. Therefore, Once a a product substantially similar product is disclosed in the reference, the burden is shifted to the applicant to show that the product in the reference would not function similarly. Alternatively, the claiming of a new use, new function or unknown property which is inherently present in the prior art does not necessarily make the claim patentable.
